

HARDING · LOEVNER®

Fundamental. Thinking. Worldwide.

Investment Philosophy

Harding Loevner utilizes a bottom up approach for building a diversified portfolio of high-quality growth stocks. It undertakes in-depth fundamental research to identify well-managed, financially strong companies that have sustainable competitive advantages that should allow them to grow profitably for long periods.

Investment Objective

The Global Equity Portfolio seeks long-term capital appreciation through investment in equity securities of companies based both inside and outside the United States.

Total Returns

	Inception Date	Average Annualized Total Returns as of March 31, 2008					
		3 month	1 year	3 years	5 years	10 years	Since Inception
Global Equity Portfolio - Net	12/01/96	-5.86%	6.01%	14.51%	17.68%	6.35%	7.38%
Global Equity Portfolio - Gross		-5.57%	7.34%	15.95%	19.16%	7.69%	8.73%
MSCI All Country World Index		-9.29%	-1.16%	11.09%	17.18%	5.18%	6.94%

Performance data quoted represents past performance; past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance of the Portfolio may be lower or higher than the performance quoted. Performance data current to the most recent month end may be obtained by calling (877) 435-8105 or visiting [www.hardingloevner.com](http://www.hardingloevner.com). Performance data shown does not reflect the 2.00% redemption fee imposed on shares held less than 90 days. If it did, total returns would be reduced.

**The Portfolio invests in foreign securities, which will involve greater volatility and political, economic, and currency risks and differences in accounting methods. It also invests in emerging markets, which involve unique risks, such as exposure to economies less diverse and mature than the U.S. or other more established foreign markets. Economic and political instability may cause larger price changes in emerging markets securities than other foreign securities.**

The MSCI All Country World Index is a free float-adjusted market capitalization index that is designed to measure equity market performance in the global developed and emerging markets. The Index consists of 48 developed and emerging market countries. Net dividends reinvested. You cannot invest directly in this Index.

All holdings and sector/region allocations are subject to review and adjustment in accordance with the Portfolio's investment strategy and may vary in the future, and should not be considered recommendations to buy or sell any security. The Portfolio is actively managed; therefore holdings may not be current.

Investment performance reflects fee waivers and in the absence of these waivers investment performance would be reduced.

\*MSCI All Country World Index; <sup>2</sup> Trailing one year; <sup>3</sup> Trailing five years, annualized; <sup>4</sup> Trailing three years, annualized. Source: Wilshire Atlas (Run Date April 8, 2008) Based on the Portfolio's underlying holdings.

Average Weighted Market Capitalization: the product of a security's price & the number of shares outstanding. Price/Earnings: the ratio of a firm's closing stock price & its trailing 12 months' earnings/share. Price/Cash Flow: the ratio of a firm's closing stock price & its fiscal year end cash flow/share. Price/Book: the ratio of a firm's closing stock price & its fiscal year end book value/share. Return on Equity: the net income divided by total common equity outstanding, expressed as a percent. Alpha: a measure of risk-adjusted return. Beta: a measure of the portfolio's sensitivity to the market. R-Squared: a measure of how well a portfolio tracks the market. Sharpe Ratio: the return over the risk free rate per unit of risk. Standard Deviation: the statistical measure of the degree to which an individual value in a probability distribution tends to vary from the mean of the distribution. Return on Assets: net income for past 12 months divided by total assets. Earnings Per Share: portion of a company's profit allocated to each outstanding share of common stock. Debt/Equity Ratio: total long-term debt divided by total shareholder's equity. Profit Margin: relationship of gross profits to net sales.

*The Portfolio's investment objectives, risks, charges and expenses must be considered carefully before investing.
