

**Investment Philosophy**

Harding Loevner utilizes a bottom-up approach for building a diversified portfolio of high-quality durable-growth companies that are well-managed, financially-strong and possess clear competitive advantages. We purchase shares at prices where we see value. We seek long-term relative outperformance with lower risk. Our investment process focuses on understanding the competitive structure of industries, since we believe this has a significant influence over the long-term durability of corporate margins and earnings growth.

**Investment Objective**

The Global Equity Portfolio seeks long-term capital appreciation through investment in equity securities of companies based both inside and outside the United States.

**Total Returns (%)**

	Inception Date	Average Annualized Total Returns as of June 30, 2010				
		3 Months	1 Year	3 Years	5 Years	10 Years
Global Equity Portfolio - Net	12/01/96	-11.04	13.67	-5.40	4.91	1.67
MSCI All Country World Index		-12.12	11.77	-10.52	1.16	-0.26
Lipper Global Fund Index		-11.63	11.25	-9.96	1.40	0.08

**Calendar Year Returns**

Performance data quoted represents past performance; past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance of the Portfolio may be lower or higher than the performance quoted. Performance data current to the most recent month end may be obtained by calling (877) 435-8105 or visiting [www.hardingloevnerfunds.com](http://www.hardingloevnerfunds.com). Performance data shown does not reflect the 2.00% redemption fee imposed on shares held 90 days or less; otherwise total returns would be reduced.

The Portfolio invests in foreign securities, which will involve greater volatility and political, economic, and currency risks and differences in accounting methods. It also invests in emerging markets, which involve unique risks, such as exposure to economies less diverse and mature than the U.S. or other more established foreign markets. Economic and political instability may cause larger price changes in emerging markets securities than other foreign securities. Investments in debt securities typically decrease in value when interest rates rise. This risk is usually greater for longer-term debt securities. Investment by the Portfolio in lower-rated and non-rated securities presents a greater risk of loss to principal and interest than higher-rated securities.

The MSCI All Country World Index is a free float-adjusted market capitalization index that is designed to measure equity market performance in the global developed and emerging markets. The Index consists of 45 developed and emerging market countries. The Index is net of foreign withholding taxes on dividends. The Lipper Global Fund Index, an unmanaged index published by Lipper Analytical Services, Inc., includes 30 funds that are generally similar to the Fund, although some funds in the index may have somewhat different investment policies or objectives. This index invests at least 25% of its total assets in securities traded outside the US and may own US securities. You cannot invest directly in these Indices.

All holdings and sector/region allocations are subject to review and adjustment in accordance with the Portfolio's investment strategy and may vary in the future, and should not be considered recommendations to buy or sell any security. The Portfolio is actively managed; therefore holdings may not be current.

Investment performance reflects fee waivers and in the absence of these waivers investment performance would be reduced.

<sup>1</sup>Lower minimums available through selected fund distributors; <sup>2</sup>Harding Loevner has voluntarily agreed to cap the total annual fund operating expenses at 1.25% (on an annualized basis) of the average daily net assets of the Portfolio for an indefinite period; <sup>3</sup>MSCI All Country World Index; <sup>4</sup>Other includes countries outside the benchmark where some holdings are incorporated.

Source: Wilshire Atlas (Run Date July 8, 2010) Based on the Portfolio's underlying holdings.

Average Weighted Market Capitalization: the product of a security's price & the number of shares outstanding. Price/Earnings: the ratio of a firm's closing stock price & its trailing 12 months' earnings/share. Price/Cash Flow: the ratio of a firm's closing stock price & its fiscal year end cash flow/share. Price/Book: the ratio of a firm's closing stock price & its fiscal year end book value/share. Return on Equity: the net income divided by total common equity outstanding, expressed as a percent. Alpha: a measure of risk-adjusted return. Beta: a measure of the portfolio's sensitivity to the market. R-Squared: a measure of how well a portfolio tracks the market. Sharpe Ratio: the return over the risk free rate per unit of risk. Standard Deviation: the statistical measure of the degree to which an individual value in a probability distribution tends to vary from the mean of the distribution. Return on Assets: net income for past 12 months divided by total assets. Earnings Per Share: portion of a company's profit allocated to each outstanding share of common stock. Debt/Equity Ratio: total long-term debt divided by total shareholder's equity. Profit Margin: relationship of gross profits to net sales.
