¹Annualized Returns; ²Variations of monthly returns from the average, since inception, annualized, ³Performance results reflect the effects of all investment advisory fees, ⁴Performance results do not reflect the effects of investment advisory fees.

⁵The Global Equity Portfolio commenced operations on December 1, 1996, following a tax-free merger with the HLM Global Equity Limited Partnership ("GELP").

⁶The MSCI All Country World Index, the primary benchmark, is a free float-adjusted market capitalization index that is designed to measure equity market performance in the global developed and emerging markets. The Index consists of 49 developed and emerging market countries. Net dividends reinvested. You cannot invest directly in this Index.

⁷The Lipper Global Fund Index, an unmanaged index published by Lipper Analytical Services, Inc., includes 30 funds that are generally similar to the Portfolio, although some funds in the index may have somewhat different investment policies or objectives. This fund invests in at least 25% of its total assets in securities outside the US and may own US securities. You cannot invest directly in this Index.

Performance data quoted represents past performance; past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance of the Portfolio may be lower or higher than the performance quoted. Performance data current to the most recent month end may be obtained by calling 1-877-435-8105 or visiting www.hardingloevner.com.

Currently, the investment advisor of the Portfolio is waiving a portion of its fee. Absent such waiver, the expense ratio of the Portfolio would be higher and the Portfolio's performance lower.

The Portfolio invests in foreign securities, which will involve greater volatility and political, economic, and currency risks and differences in accounting methods. It also invests in emerging markets, which involve unique risks, such as exposure to economies less diverse and mature than the U.S. or other more established foreign markets. Economic and political instability may cause larger price changes in emerging markets securities than other foreign securities.
