

HARDING · LOEVNER®

Investment Philosophy

Harding Loevner utilizes a bottom up approach for building a diversified portfolio of high-quality growth stocks. It undertakes in-depth fundamental research to identify well-managed, financially strong companies that have sustainable competitive advantages that should allow them to grow profitably for long periods.

Investment Objective

The International Equity Portfolio seeks long-term capital appreciation through investment in equity securities of companies based outside the United States.

Performance data quoted represents past performance; past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance of the Portfolio may be lower or higher than the performance quoted. Performance data current to the most recent month end may be obtained by calling (877) 435-8105 or visiting www.hardingloevner.com. Performance data shown does not reflect the 2.00% redemption fee imposed on shares held less than 90 days. If it did, total returns would be reduced.

The Portfolio invests in foreign securities, which will involve greater volatility and political, economic, and currency risks, such as exposure to economies less diverse and mature than the U.S. or other more established foreign markets. Economic and political instability may cause larger price changes in emerging markets securities than other foreign securities.

The MSCI All Country World ex-US Index is a free float-adjusted market capitalization index that is designed to measure equity market performance in the global developed and emerging markets, excluding the US. The Index consists of 47 developed and emerging market countries. Net dividends reinvested. You cannot invest directly in this Index.
